BULK CONTAINER STORAGE SYSTEM

All bulk containers (1000L containers) must be banded to comply with regulations which means the bund must contain at least 1000 Litres. These units offer a cost effective and space saving solution, without compromising quality. Available in both single and double units (don't forget the spare 1000L container must be banded) and with a couple of unique accessories.

Prt No.	Desc	Dimensions W x D x H	Capacity
SDBB1	Polyethylene 1 x 1000L bund	1760mm x 1350mm x 875mm	1100L
SDBB2	Polyethylene 2 x 1000L bund	2550mm x 1350mm x 610mm	1140L

PVC BUND COVERS

Spilldokter has now launched a solution to outdoor container storage which the market has been searching for - a robust and simple to assemble weather cover for drum and IBC bunds. These units include a knock down galvanized steel frame (Stainless also available) which supports a heavy duty PVC cover with zipper door to the front for quick access.

No more checking bunds for accumulated stormwater, and no chance of contaminated stormwater leaving the bund. Packs flat for transport. Cover the containers and cover yourself; add a bund cover.

Prt No.	Desc	Dimension*
SDBP4LC	PVC cover and Galv frame for 4 drum bund SDBP4L	1300 H
SDBP2C	PVC cover and Galv frame for 2 drum bund SDBP2	1300 H
SDBB1C	PVC cover and Galv frame for 1 x 1000L bund SDBB1	1700 H
SDBB2C	PVC cover and Galv frame for 2 x 1000L bund SDBB2	1700 H

* Height from top of bund.
