

# CHEMICAL ABSORBENTS

**NEW**  
Pad Dispenser

## PADS

SPILLDOKTOR chemical absorbent pads are made using the latest ultrasonic bonded and perforated design. This product offers outstanding absorbency and versatility - need a small pad? Every pad tears in half, chemical pads will absorb a wide spectrum of liquids including acids, alkalis and waterbased chemicals. Ideal for hazardous materials users and laboratories, these pads are yellow for easy identification. Available in one popular size as below. The applications are endless.

Prt No.	Desc	Dimensions	Pck Qty
CPL4545	200gsm chemical pad	400mm x 450mm	200
CPL4545D	200gsm chemical pad in dispenser box	400mm x 450mm	200

## MINI BOOMS

Chemical Minibooms are the answer to effective chemical spill management. Used widely in the plastics, medical and chemical manufacturing industries for cleaning up a huge range of liquids. As these absorbents are hydrophilic, waterbased chemicals are quickly absorbed, as are acids and alkalis. Coloured yellow for quick identification available in various user friendly sizes as below. Chemical minibooms - use them to prove them.

Prt No.	Desc	Dimensions	Pck Qty
CB7512	Chemical miniboom	75mm x 1.2m	40
CB7530	Chemical miniboom	75mm x 3.0m	6

## PILLOWS

SPILLDOKTOR chemical absorbent pillows offer an effective and 'high soakage' solution to leaking valves, damaged containers and split liquids. As with chemical pads and minibooms these pillows are popular with many chemical related industries and are simple to identify by their yellow colour. Soak it up, clean it up. Use a chemical pillow.

Prt No.	Desc	Dimensions	Pck Qty
CPI6035	Chemical pillow large	600mm x 350mm	20
CPI3520	Chemical pillow small	350mm x 200mm	20
