

DRUM STORAGE SYSTEMS

SDBP4L

BUNDED DRUM STORAGE SYSTEM

All liquids stored on site need to be safely banded, (as required by law) and in a unit which will contain at least the largest stored container should it spill. This is now a simple matter with SPILLDOKTOR poly drum bunds. Available in both 2 drum and 4 drum sizes, featuring removable grating and provision for fork tynes, and made from heavy duty polyethylene for durability.

Prt No.	Desc	Dimensions W x D x H	Capacity
SDBP2	Polyethylene 2 drum bund	1275mm x 815mm x 400mm	230L
SDBP4L	Polyethylene 4 drum bund	1275mm x 1275mm x 310mm	240L

SDBP2

LOW PROFILE BUND SYSTEM

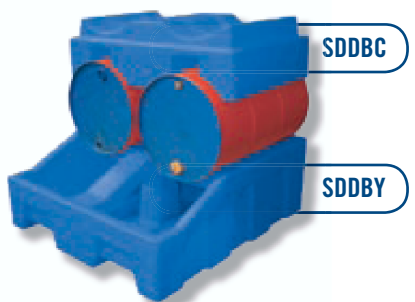

When manual handling and environmental concerns are equally important, the solution is low profile poly bunding. Available in 2 drum and 4 drum and 4 drum in-line versions, these units measure only 150mm high but comply with bunding requirements when used correctly.

These units can be connected with a simple bund to bund connector, which will increase the bund capacity.

Also available is an optional ramp which makes drum loading a breeze and removable grating means easy cleaning.

Prt No.	Desc	Dimensions W x D x H	Capacity
SDBF2	Low profile polyethylene 2 drum bund	1275mm x 740mm x 160mm	150L
SDBF4	Low profile polyethylene 4 drum bund	1275mm x 1275mm x 160mm	300L
SDBF4S	Low profile polyethylene 4 drum bund inline	2550mm x 740mm x 160mm	300L
SDBFR	Polyethylene ramp for low profile bunds		-
SDBFC	Connector kit for low profile bunds		-

SDDBC

SDDBY

DRUM DISPENSING SYSTEM

This unit can stack and decant up to 4 drums at one time, with the added assurance that a large spill can be contained. The two part drum rack and stack unit is very popular when 2 or more different drums are in consistent use. These units are forkable to make handling simple and made from durable polyethylene. Order units separately as below.

Prt No.	Desc	Capacity
SDDBY	Drum rack and stack poly base unit	400L
SDDBC	Drum rack and stack poly cradle unit	-

SDCP2

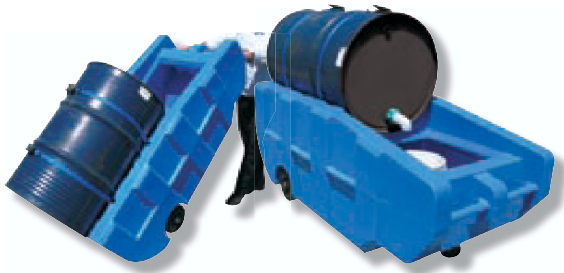

HARDCOVER DRUM BUND

The ultimate outdoor drum storage unit, the hardcover drum bund stores 2 drums in a lockable and weatherproof polyethylene bund. Simple to access and built with stays to hold lid open, this unit is a must for outdoor decanting stations etc, and fully complies with bunding regulations.

Prt No.	Desc	Capacity
SDCP2	Hardcover lockable poly bund with lid	400L

DRUM HANDLING

SPILL CONTAINMENT CADDY

No longer are 205L drums awkward and heavy, and a recipe for spills and injuries. With the spill containment caddy these can be moved and decanted in safety, anywhere at anytime. This unit features a unique design which makes use of the lever principle to rotate a standing drum to the horizontal position, where a swivel wheel allows the whole unit to travel along the floor. The caddy doubles as a bund, with a 230 Litre capacity to contain at least one whole container, should it spill or leak.

Prt No.	Desc	Capacity
SDBT230	Poly Spill containment caddy	230L

DRUM TROLLEYS

Life around the workshop can now be safer and easier with these drum handling trolleys. Designed and built to move containers up to 205L around while containing small leaks and spills, these units are available as a single drum trolley with optional handle or a general use trolley also with handle.

Prt No.	Desc	Capacity
SDBT100	Poly banded trolley for 4 x 25 cans	100L
SDPDD	Drum dolly for 1 x 205L	-
SDPDDH	Drum dolly for 1 x 205L with handle	-

SPILL FUNNELS

Spill funnels eliminate the mess and spills associated with pouring into containers. These well designed units feature a draining area for oil filters and an optional lid for weather protection. Ideal for areas where waste liquids are regularly poured into drums.

Prt No.	Desc	Capacity
SDDF50	Funnel to suit 205L drum	-
SDDFL	Plastic lid suits funnel or drum top	-

DRUM RACKING BUND

There is a simpler and safer approach to storing liquids in racking - poly racking bund. These units are designed to suit standard racking while preserving space, and contain the legal minimum when storing 205L containers - at least one whole container. Ideal for warehousing of containers from 5L up to 205L, such as oil, coolant, chemicals and more.

Prt No.	Desc	Capacity
SDRB1	Poly racking bund	220L

(Racking for illustration purposes only).
