

reSORB™ SORBENTS

offering a smart alternative to meltblown

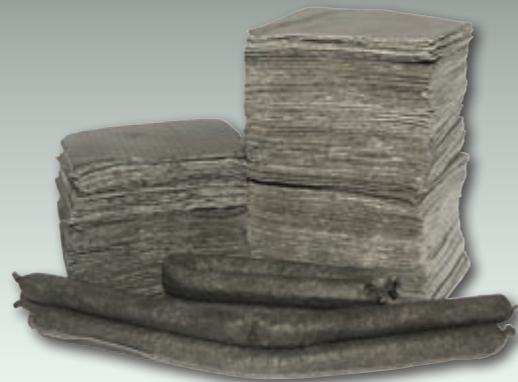

- Made from **recycled and renewable** resources
- Requires **less energy** to produce than conventional sorbents
- Reduces dependency on oil which is a fossil fuel
- Absorbs up to **50% more** than meltblown sorbents

reSORB™ universal sorbents are made from natural fibres which are plantation grown and recycled and are therefore a **sustainable resource**.

As well as reducing our footprint on the environment these sorbents are actually up to 50% more absorbent than meltblown sorbent products.

Available in individual pads and socks as used in the SPILLDOKTOR reSORB™ spill kits.

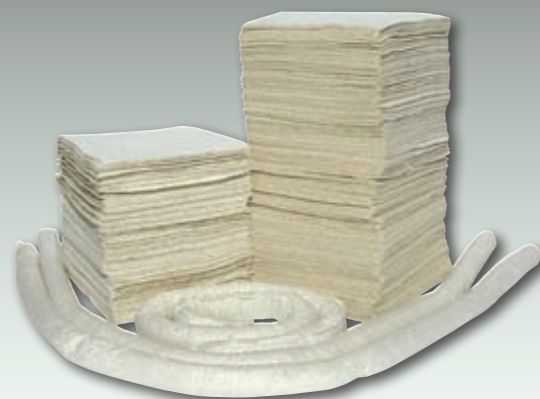

Prt No.	Desc	Pck Qty
eUB7512	reSORB™ universal sock 1200mm	30
eUP4545	reSORB™ universal pads 400 x 500mm x 200gsm	200

reSORB™ oil and fuel sorbents represent a breakthrough in sorbent technology. The recycled fibres of this product are treated to become **hydrophobic**, which is critical for cleaning up **hydrocarbons**.

Available in individual pads and socks as used in the SPILLDOKTOR reSORB™ spill kits.

Today's absorbents are largely manufactured from polypropylene, which is derived from fossil fuels...

Is there a viable alternative - one that will offer a lower carbon footprint but doesn't compromise on performance?

Yes, there is. reSORB™ absorbents.

reSORB™ absorbents are manufactured from plantation grown & recycled cotton fibres, one of the most widely available sustainable resources...now we're talking.

reSORB™ OIL & FUEL SPILL KITS

reSORB™ UNIVERSAL SPILL KITS

eDOK240-H
